

TELEPHONE SET HAVING A HELP KEY AND METHODS  
AND SYSTEMS FOR USE THEREWITH

Abstract of the Disclosure

5

A telephone set comprises a help key, a telephone  
service key to initiate a telephone service, and a  
logic circuit. The logic circuit detects a  
simultaneous actuation of the help key and the  
10 telephone service key, and in response thereto,  
retrieves help information specific to the telephone  
service.
